

Jozef Janosko

Dynamic and results-driven Front-End Developer with a strong foundation in React Native, React.js, and full-stack web and mobile development. Proven track record of building and managing mobile applications from the ground up, including navigation, backend interaction, and native functionality. Experienced in leading teams, setting priorities, and delivering successful projects.

Professional Experience

Front End Lead Developer, Juego.Juegos ♦ 05/2023 - Present.

- Created the front-end of a mobile application using React Native from scratch.
- Wrote GraphQL queries to a backend hosted on DynamoDB using AWS Amplify.
- Wrote HTTP requests to third-party RESTful APIs for services like Stripe, Yelp, and Firebase Cloud Messaging (FCM).
- Managed a team of front-end developers, set team priorities, and reported progress back to the Company's founder.
- Developed a custom component library for React Native.
- Managed the app's builds and releases to Google Play and the App Store using Expo Application Services.
- Developed a Caching system to store data locally, minimizing calls to the backend.
- Created a localization system that translated text in the app to different languages.
- Created an admin portal using React.js for authenticated admins, allowing them to review user generated reports and ban accounts who violated our terms of service.

Front-End Web Developer, Ares Computer Systems ♦ 08/2021- Present.

- Created the front-end for a web portal using HTML, CSS, JQuery, and the Bootstrap library.
- Created various test cases for an ISO 8385 server using a specifications manual, and tested each test case to ensure the server generated the correct response.
- Reviewed and edited software installation guides for user readability.
- Created a web application using React.js, connecting to a backend using GraphQL on Amplify.

Education

New Jersey Institute of Technology, Newark, NJ

Bachelor of Science: Computer Science ♦ Spring 05/2023 ♦ GPA: 3.5 ♦ Graduated Cum Laude.
